

## ARTIST OF THE WEEK - SOLAR HEAT

### **Category:** Music

This weeks artist is a group that goes by the name *Solar Heat*. Not only are the three guys in a band, they are brothers.

*Solar Heat*, is 16 year old CJ, and his 14 year old twin brothers Cody and Mack. Now I know the first thing you are thinking is that these guys are to young, and aren't going to be playing anything you want to hear. Well let me tell you, you couldn't be more wrong.

With CJ on guitar and sharing lead vocals with Cody on bass, and Mack on drums, these guys will take you back to a time when Skynrd, 38 Special, and all the other great Southern Rock bands, were the only bands worth listening to.

With the release of their first CD, "On The Right Track" , and the constant tour schedule that they keep, it's no wonder their fan base is constantly growing. Coming to us out of Baton Rouge, Louisiana, these young men have already been playing together for 6 years.

With influences such as Lynyrd Skynyrd, CCR and Brooks & Dunn. It is not hard to find a great sound in everything that they do.

Be it a cover tune, or a original such as, "Me and My Guitar" or "Texas Holdem", this group of guys will take you to a place that you thought was long forgotten, and they will do it with guitar playing and harmonies that you have been missing from music for a lot of years.

So take a couple of minutes and look into *Solar Heat*, you can find them at [www.myspace.com/thesolarheat](http://www.myspace.com/thesolarheat). And as always, let him know... you heard it here first.
